PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate (GPA 3.45/4.00) with comprehensive expertise in Software Engineering and DevOps. Highly competitive and challenge-driven, consistently pushing boundaries to explore, learn, and improve. Proven track record in developing full-stack applications, managing server infrastructure, and building centralized monitoring systems. Combines a strong technical foundation in frontend technologies, backend programming, and ERP systems with adaptability and efficient problem-solving in fast-paced environments.

PROFESSIONAL EXPERIENCE

Software Engineer & DevOperations <i>PT Cnaindo</i>	Oct 2025 – Present
- Built an integrated spreadsheet-based server monitoring system for real-time operational status and data tracking. - Developed a centralized error tracing service to streamline the identification, detection, and troubleshooting across multiple microservices. - Developed and maintained backend infrastructure using Python and C programming languages. - Designed and built responsive frontend interfaces utilizing a custom framework based on Python and XML scripts.	
IT Support & Administration Intern <i>PT. Hume Concrete Indonesia</i>	Jun 2024 – Aug 2024
- Supported IT operations and resolved hardware, software, and network issues for staff to ensure zero operational downtime. - Maintained administrative records, system documentation, and supported departmental data entry workflows.	
IT Training Administrator Intern <i>BPPTIK Kementrian Kominfo</i>	Feb 2024 – Apr 2024
- Managed official social media accounts, processed participant data, and tracked attendance for formal government training classes. - Coordinated and facilitated DEA (Digital Entrepreneurship Academy) Batch 2 classes, handling data backup and communications.	
SEO Content & Web Optimization Intern <i>Kampus Dosen Jualan</i>	Aug 2023 – Dec 2023
- Created SEO-optimized articles to improve search rankings and managed client website content updates ensuring accuracy. - Monitored web performance, resolved broken links, and addressed layout issues to enhance user experience and branding.	

KEY PROJECTS & BOOTCAMP

Bootcamp ERP with Epicor (2025): Completed intensive training on Epicor ERP, gaining hands-on execution in Purchasing, Sales, and Production modules. iTrucking Management System (2024): Co-developed an inventory transfer system with real-time IoT tracking devices installed on delivery trucks. Idle Endless Runner Game (2023): Designed visual effects and UI interfaces, and performed comprehensive game testing in a collaborative Unity team environment. Food Ordering Website (2022): Developed a local-hosted full-stack ordering website utilizing PHP, MySQL, and XAMPP.
